United States v. Mitchell United States v. Mitchell, 518 U.S. 913 (1996), was a United States Supreme Court case in which the Court ruled that certain provisions of the Internal Revenue Code were not unconstitutional. Background The case pertained to the Anti-Injunction Act, a federal statute in the United States Tax Code. The Anti-Injunction Act prohibits the federal courts from issuing a "judgment for the purpose of preventing the assessment or collection of any tax." On November 1, 1993, the District Court found the defendant liable for nonpayment of tax and interest. On May 19, 1994, the District Court issued a pre-judgment writ of execution allowing a collection officer to seize property to satisfy the judgment. Before the writ was executed, the defendant petitioned for review of the District Court's decision in the Court of Appeals. On March 29, 1995, the Second Circuit Court of Appeals affirmed the District Court's decision. The next day, the defendant appealed the Court of Appeals ruling to the United States Supreme Court. Opinion of the Court Justice Antonin Scalia delivered the unanimous opinion of the Court affirming the decision of the Court of Appeals. Scalia determined that the District Court was correct in refusing to issue a writ of execution because the Anti-Injunction Act prohibited them from doing so. Furthermore, Scalia argued that the provisions of the Internal Revenue Code that provided the basis for the Department of Treasury's authority to issue the writ of execution were constitutional. Scalia explained that Congress had the constitutional authority to lay taxes and that the federal government was allowed to collect taxes by issuing execution writs to the county law enforcement officials.
