Crop, rotate, and scale
Cropping is the first step to image editing. When you import an image, the layer that contains the image is already cropped for you, but it's easy

to crop the image again using the Crop tool, shown in Figure 1-3. After cropping, you can resize the image to your liking using the Crop tool. **Figure 1-3:** The Crop tool automatically crops and resizes the image after importing. In some instances you can crop the image to a specific size, but usually you should crop the image to the largest area in the

image. This way you are working with the largest amount of your image.

Cropping can help you create an image that is ideal for your needs. You can also use the Rotate and Scale tools, shown in Figure 1-4, to transform the image if you'd like. The three arrows represent the tools. The

Rotate arrow's arrow points toward the center of the image.

The Scale arrow's arrow points toward the right of the image.

The Rotate and Scale arrows are on the Tools panel's left side of the Photoshop screen.

****Figure 1-4:**** The Rotate and Scale tools enable you to transform the image in many ways.

Photoshop for serious photo editing and web design

Photoshop Elements 8 may seem lacking in comparison to Photoshop and you may find it on the slow side and clunky.

There is no doubt, however, that Photoshop Elements is an excellent tool for casual photographers and hobbyists.

For serious photo editing and web design, Adobe Photoshop

is the clear, superior choice. The same applies for graphic designers. Professionals use Adobe Photoshop because it is more capable of designing high-quality images. Photoshop Elements is not a bad program, but it is designed to work well on raw, non-edited photos and graphics. For professional graphic designers, Photoshop is the best choice. Which is best

for you depends on your preferences. If you are a hobbyist or beginner, Elements might be more suitable. If you are a professional, you will likely prefer Photoshop.

Which is better? Which is best? Adobe Photoshop Elements and Photoshop have

a lot in common and contain many of the same features.

There are, however, a few significant differences: Adobe Photoshop Elements is designed to work with RAW and RAW-compressed files. Images (JPG and PNG) need to be converted to RAW before they can be edited. This is not necessary for Photoshop.

Adobe Photoshop Elements

has a simple, less complex user interface. Adobe Photoshop has a more complex, user-friendly interface with lots of options and features. Adobe Photoshop Elements is designed for casual photographers and hobbyists. It offers fewer features for photo editing and web design. Adobe Photoshop Elements includes Adobe Elements Organizer and

Share which allow you to manage and share files and folders. Photoshop does not include these tools. Adobe Photoshop Elements has a simple web service that allows you to create web galleries directly from your desktop. Photoshop does not have this web service. Photoshop Elements requires a fair amount of disk space.

Now that we have examined these differences, it is time to take a look at each program, comparing their most important features, capabilities and user interfaces. the place of arrest, may have been "a crucial factor in the defendant's decision to cooperate [with police], and was not obtained in violation of any constitutional rights." *Id.* at 611, 96 S.Ct. at 2832. Thus, in the present case, the effect of the police's statement to Biggins that they knew he

was a convicted felon could only have been coercive and inducing. That a truthful statement about Biggins' record would only have been detrimental to him does not alter this conclusion. 3. The effect on the will of the defendant Biggins' will was affected by the statement. He contends that the statement as such "might cause a man in

[his] position to believe that if he does not tell the police what he knows they will make his life difficult." Answer at 20. However, because the statement did not induce Biggins to make the statement, we must direct our inquiry to what effect the statement had upon the accused. In *Bradford v. Kentucky*, 470 U.S. 60, 105 S.Ct. 1074, 84 L.Ed.2d 46

(1985), the defendant was convicted of attempted armed robbery. On appeal, the Kentucky Supreme Court ruled that the trial court erred in refusing to give a jury instruction that read as follows: "If... [a] defendant... voluntarily discloses a crime to an arresting officer... and there is no charge or conviction for such offense, then such a

voluntary disclosure would not be a crime." Id. at 62, 105 S.Ct. at 1076. The Supreme Court reversed. First, the Court considered the state supreme court's decision as applied to the question of whether a criminal defendant should be allowed to present evidence of a collateral crime to support a theory of self-defense. The Supreme Court's analysis of

this question began with the observation that "a state rule limiting admissible evidence, either to relevant or irrelevant material, is `not a federal constitutional rule.'" Id. at 64, 105 S.Ct. at 1077. This statement must be read in light of the Supreme Court's previous holding in *Davis v. Alaska*, 415 U.S. 308, 316-17, 94 S.Ct. 1105, 1110, 39

L.Ed.2d 347 (1974), that "the accused does not have an unfettered right to rebut adverse inferences drawn by the State from an inspection of his [own] probation record," because the state rule limiting ad
