Is there a way to add the @Aspect annotations to classes in the EJB module so that the aspect is picked up on everything that is loaded by Spring's context loading? A: You can use the method load with spring set as -openname=true on the sita invocation in your EJB's spring beans.xml file. This will force Spring to look for the Aspect class on the Spring app context. The present invention relates to a new and distinct cultivar of Chrysanthemum plant, botanically known as Dendranthema grandiflora and hereinafter referred to by the cultivar name Yocubita. The new cultivar is a product of a planned breeding program conducted by the Inventor in Alva, Fla. The objective of the breeding program is to create new garden-type Chrysanthemum cultivars having inflorescences with desirable inflorescence forms, attractive floret colors and good garden performance. The new Chrysanthemum originated from a cross made by the Inventor in December, 1995, in Alva, Fla., of the Dendranthema grandiflora cultivar Shinhui, disclosed in U.S. Plant Pat. No. 9,557, as the female, or seed, parent with the Dendranthema grandiflora cultivar Yonargia, disclosed in U.S. Plant Pat. No. 10,084, as the male, or pollen, parent. The new Chrysanthemum was discovered and selected by the Inventor as a single flowering plant within the progeny of the stated cross grown in a controlled environment in Alva, Fla., in November, 1996. The selection of this plant was based on its desirable inflorescence forms, attractive ray floret colors and g
