On this page, you can view a full list of all the files scanned by Total AV. This is quite an extensive list, but theres no way to get a full list of all file types, so if youre suspicious about a file, you have to click on that file to see the details. Total AV came up with five levels of protection from its official website and each product is available at three levels of pricing for PCs and Macs. The higher protection costs more, but Total AV includes a complete suite of extra features that cost nothing. From there, you can get free updates and unregistered (www.total-av.com) or the Premier edition (totalav.com) to keep your security in check. The Last thing I would like to talk about is the software itself. This is a pretty impressive program and is well worth a look if you are in need of antivirus software. And, with the Absolute Total AV Lifetime License, you can be confident that you wont be bumping into any problems. With that said, you have to keep in mind that you will be using a free version that only offers limited support and some basic functions. However, its perfectly acceptable for home use. Just make sure you do a little investigating to make sure your needs are met here. There are no dummies in the business of making antivirus solutions. I read it here and I did not believe that Total AV was a scam, they need to be a legitimate company. I would suggest that if it bothers you so much, try to write them a letter. To bad though. I give it three stars because they helped me a lot. I believe that you can do a discount of 30% for your lifetime. A list of discounts can be found here . 5ec8ef588b
